

To be completed if patient is 21 years of age or older

## Hearing Health Questionnaire

The onset of hearing loss is usually very gradual. It may take place over 25-30 years, or it may happen more rapidly if you are exposed to loud noises at work or through hobbies. Because it usually occurs slowly, you may not even be aware that you have a problem until someone brings it to your attention.

Please Circle Yes or No

I have a problem hearing over the telephone.	Yes	No
